AMENDEMENT A

In response to the Office letter mailed on July 13, 2005 kindly amend the following application as follows:

SPECIFICATION

Due to large amount of changes, the entire specification is reproduced and a separate marked copy is included herewith.

substitute specification approved for entry CV 2/28/06

BACKGROUND OF THE INVENTION

1. Field of the invention

This invention pertains generally to an energy efficient axial fan for exhausting humid, corrosive and dusty air from a variety of buildings, including, by way of example: foundries, manufacturing facilities, poultry operations, green houses, etc...

More particularly, the present invention relates generally to new and useful improvements
